Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-27, 48-61, 82, 83, 89 and 90 drawn to image alignment method and apparatus, classified in class 382 subclass 294.
 - II. Claims 28-33, 41-47, 62-81 and 91 drawn to image comparing method and apparatus, classified in class 382, subclass 219.
 - III. Claims 34-40 and 84-88 drawn to image segmenting method and apparatus, classified in class 382, subclass 171.

Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, the claimed invention III has separate utility such as image segmenting method and apparatus, and this utility is not needed by inventions I and II which are image alignment and image comparing method and apparatus. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2625

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II and group III, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even through the requirement be traversed (37 CFR 1.143).
